

HYDROGEN SCOTLAND CONFERENCE 2026

 *Hilton Glasgow*

 Oct 6th

18 years!

Now in its 18th year, the Hydrogen Scotland Conference is one of the most anticipated events in the Scottish hydrogen calendar.

This year's conference has been reshaped around what attendees told us they value most- bringing everything into a single, carefully curated day. The programme is full and varied, featuring interactive workshops led by leading experts, hands-on training sessions, and ample opportunity to connect meaningfully with those driving the future of hydrogen- from industry, academia, policymakers and the next generation.

Our theme for 2026? From Supply to Demand.

Why partner with us?

Being a partner at the Hydrogen Scotland Conference puts your organisation at the heart of Scotland's hydrogen community- in front of the people shaping the sector's future. Whether your goal is visibility or relationship-building, we'd welcome a conversation about how we can work together.

Find out more about the conference and partnership opportunities [here](#).

Highlights

The Plenary

The plenary opens with keynotes from prominent voices across the hydrogen sector, framing the big issues of the moment before delegates disperse into the day's workshops. It's where the conversation starts.

Workshops & Training

Led by some of the best minds in the hydrogen sector, our workshops spark genuine debate across the topics that matter most. Past attendees have consistently praised both the breadth of topics covered and the quality of discussion, making the workshops one of the most valued parts of the day.

Exhibition & Networking

The Hilton Glasgow is ideally suited for a great networking experience for exhibitors & other delegates, with clustered breakout rooms and spaces designed to encourage conversation. Last year's attendees appreciated the balance between sessions and informal networking, and this year's programme has been crafted with that in mind.

Drinks, Food & Awards

Wind down with drinks and a buffet - then join us to celebrate the people, projects, and organisations at the heart of the sector.
